DIY Block Lamp

Materials List

(120) 1" Blocks

Wood Glue

(2) $\frac{3}{4}$ " Screws

(1) Portable LED Bulb with Base

- 1. Build the base of your lamp by using a thin layer of wood glue to glue together 25, 1" blocks into a square.**
- 2. Use the bulb base to mark the 2 screw holes and predrill to avoid splitting the wood.**

3. Line up the bulb base with the predrilled holes and drive the 2 screws into the wood base.

4. Insert the bulb into the base to use as a reference while building the rest of your lamp.

5. Glue one layer of blocks on top of the perimeter of the base.
